

Arasu Ramanan A

AI Full Stack Developer | MERN Stack | React.js | Node.js | MongoDB | Javascript | Typescript | <https://arasuport.netlify.app/>
| arasua1993@gmail.com | +91 9003613416 | <https://www.linkedin.com/in/arasu-ramanan/> | <https://github.com/arasuramanan>

PROFESSIONAL SUMMARY

Full Stack Developer with **6+** years of professional software development experience, including **3+** years of specialized MERN stack experience building MERN stack applications using React.js, Node.js, Express.js, MongoDB, JavaScript, and TypeScript. Experienced in developing RESTful APIs, authentication and authorization, role-based access control, CRUD applications, third-party API integrations, responsive web applications, real-time features, payment integrations, database-driven systems, and cloud deployments. Built applications across condominium management, hyperlocal delivery, railway booking, social video, dashboards, and AI-powered financial applications.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Sass, Bootstrap, Tailwind CSS, Material UI, Redux, Responsive Design

AI: Claude AI, Chatgpt, Deepseek

Backend: Node.js, Express.js, RESTful APIs, Microservices, JWT

Database: MongoDB, MongoDB Atlas, MongoDB Compass, My SQL

Real-Time & Communication: WebSocket, Socket.io, RTSP

Cloud & Infrastructure: AWS

Tools: Git, GitHub, Postman, Netlify, Vercel

Other: Authentication, Authorization, Role-Based Access Control, API Integration, System Design, CRUD Operations.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Freelancer

Freelance | Remote | 9 months

- Developed full-stack web applications for clients using **React.js, Node.js, Express.js and MongoDB**.
- Built responsive frontend applications using **React.js**, integrating RESTful APIs and implementing reusable UI components.
- Developed **REST APIs** using Node.js and Express.js for CRUD operations, authentication, and application workflows.
- Implemented **JWT-based authentication** and stored application data using **MongoDB atlas**.
- Built backend functionality for **PDF and Excel report generation** and implemented Audit Trail features.
- Worked directly on client requirements, debugging, testing, deployment and application enhancements.

MERN Stack Developer – Greenbotz Platform

Singapore-based company | 17 Mar 2025 – 28 Nov 2025 | Coimbatore

- Developed and maintained MERN-based web applications for building and condominium management platforms using React.js, Node.js, Express.js, and MongoDB.
- Worked on **Biomex** – Condominium Management Platform, supporting resident profiles, visitor/renovation approvals, estate operations, facilities, QR visitor access, video approval, real-time notifications, payment tracking, invoices, and e-receipts.
- Developed **Multitenant** – Building Management System modules for resident, visitor, parking, and facility management with RBAC and multi-tenant architecture.
- Built APIs for resident activity, vehicle entry/exit, and visitor logs; worked with MongoDB, Redis, and AWS EC2.
- Built a **Health Check Dashboard** for Singapore-based clients using REST APIs to monitor website uptime and downtime of client's website.
- Worked on the **Splus one** mobile application using React Native and integrated third-party systems for streaming camera data into web applications using **RTSP**.

MERN Stack Developer – Kambaa Incorporation

Coimbatore-based software services company | Jan 2024 – Jan 2025 | Coimbatore

- Developed and scaled MERN-based web applications for **Easy Daily**, a hyperlocal delivery application serving local vendors and customers.
- Contributed to multiple **Freshworks** projects and implemented reusable application features.
- Developed a HTML, CSS, JS frontend for a client website, focusing on performance, SEO, responsive design, and loading speed.
- Implemented CRUD operations and REST API integrations across projects.
- Deployed frontend and backend applications on local servers and managed build, environment configuration, and testing workflows.

Full Stack Developer – Freelancer

Apr 2023 – Dec 2023 | Remote

- Developed a MERN application for a client using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs to convert JSON data into **PDF and Excel formats** and added Audit Trails.
- Implemented signup and login functionality with **JWT** setup and stored user data in **MongoDB Atlas**.
- Deployed frontend and backend applications using **Netlify**.

E-commerce Product Manager – Plutoos

Switzerland-based startup | Jan 2021 – Aug 2022 | Coimbatore

- Worked on **Shopware 5** and **Shopware 6** platforms.
- Added and managed **6,000+ products** from **Amazon.de**, primarily in printer categories.
- Managed product titles, specifications, technical details, images, pricing, and logos.

Data Logic Typesetter – Toppan Merrill

U.S.-based global financial services company | Oct 2016 – Jan 2019 | Coimbatore

- Worked on financial and legal document formatting using **XML and publishing tools** for big companies around the world.
- Handled document conversion and modification tasks using customized **HTML and CSS**.
- Followed client guidelines, quality standards, and turnaround timelines across **100+** projects.

SELECTED PERSONAL PROJECTS

Railbook Premium – Railway Booking Platform

Full-stack railway booking platform with secure authentication and authorization for **User and Admin roles**, train search, coach and seat selection, booking management, and Razorpay payment integration. Built production-style RESTful APIs using **Node.js, Express.js, and MongoDB**, with a responsive **React.js** frontend.

Technologies: React.js, Node.js, Express.js, MongoDB, Razorpay, RESTful APIs, JWT, Authentication, Authorization Live Demo:
<https://railbookpremium.netlify.app>

Looply – MERN Social Video Platform

Full-stack social video platform with Instagram Reels-style video uploads, likes, comments, follows, profiles, and authentication. Implemented REST APIs, MongoDB, Cloudinary video storage, and responsive React.js with React Query.

Technologies: React.js, Node.js, Express.js, MongoDB, Cloudinary, RESTful APIs, JWT, React Query, Vite Live Demo:
<https://looply-mern.netlify.app/login>

Real-Time Stock Market App with Alerts & AI Insights

Full-stack real-time stock market platform with live tracking, intelligent alerts, AI-driven insights, watchlists, and notification automation. Implemented WebSockets/event-driven background jobs, scheduled alerts, financial charts, authentication, user-specific watchlists, customizable alerts, AI-powered stock trend summaries, BSE and NIFTY 50 support, caching/API optimization, and server-side rendering.

Technologies: Next.js, Express.js, MongoDB, Tailwind CSS, Nodemailer, WebSockets, Vercel Live
